

Guide 2

Sayings and routines

Build boards of one-tap phrases, and routines that speak each step aloud.

The fastest way to be heard is a tile you already made. Sayings are your one-tap phrases; routines are ordered sequences Rejoin speaks aloud, step by step.

For the person using Rejoin, or a caregiver setting it up.

1. Big tiles for what you say often

Add a tile for anything said regularly, from Good morning to a full request. Tap it and Rejoin speaks it at once, no typing.

A Sayings board.

2. Let AI suggest phrases

Rejoin notices the things said often and offers to save them as tiles. Nothing is added on its own, every suggestion is approved first, so the board stays theirs.

Suggested phrases.

3. Pin and reorder

Pin the most important tiles so they lead the board. Tiles can also reorder themselves through the day, morning needs in the morning, goodnight after nine.

Pin and reorder.

4. Build a routine

A routine is a named sequence, like Bedtime or Morning. Tap it and Rejoin speaks each step aloud in turn, in your voice, to guide a caregiver through it.

A routine.

5. Edit a routine

Add, reorder, or reword steps any time. AI can even draft a routine from a single sentence describing what needs to happen.

Editing a routine.
