

Guide 11

Manage your clinician account

Update your details, change your password, and keep your access current.

Your clinician account is managed from the portal. You can edit your details, change your password, and your professional access renews on its own while you stay verified.

For clinicians using the Rejoin clinician portal.

1. Your account page

From your dashboard, open Account settings. Everything about your clinician profile lives here.

Account

Name	Amy Chen
Workplace	Sutter Health
Discipline	SLP
NPI	1234567890

Save changes

Change password · Sign out

2. Update your details

Change your name, workplace, discipline, or a mistyped NPI. Editing your credential re-runs verification; editing your name or workplace does not.

3. Change your password

You can set a new password from the account page at any time. If you forget it, use Forgot password on the sign-in screen to get a reset link.

4. Verification and access

Professional Rejoin+ access is free while you are verified, and it renews automatically. Once a year Rejoin quietly re-checks your NPI so verified access stays accurate; if a credential lapses, you will hear from us.
